

Zero Gravity

Algood's new **Zero Gravity** castor delivers a ride so smooth and so quiet, it's like being in space. This heavy duty shock absorbing castor comes with precision ball bearings that provide ease of rolling. Dual springs take on uneven surfaces and obstructions while preventing shock to the load. Thread guards prevent debris from gathering on the wheel bearings, help to retain lubricants and keep out contaminants. Pre-load capacity is 200 lbs and the bottom-out is 1100lbs., with a sweet spot of 700lbs at 4.5" of deflection. Featuring a corrosion resistant bright zinc finish, **Zero Gravity** is perfect for lift truck applications, narrow aisle reach trucks, pallet trucks, order pickers and walkie trucks.

Zero Gravity is part of Algood's innovative product line and can be customized – including spring deflection, wheel type/size and capacity of up to 65,000 lbs.– to meet particular requirements. With internal engineering and design departments in a fully integrated manufacturing facility, Algood develops customer focused castor solutions that meet specifications, timelines and budgets.
